# THE TRADER'S SANCTUARY

BUILT FOR  
MARKET  
SUCCESS

# IN THESE 3 MONTHS,

You'll Build the Skills of a Winning  
Trader in the Top 1% -

**TAKING CONTROL OF  
ALL 4 QUADRANTS OF TRADING**

**That's the core of the  
'Trading with Data Science' Program.**

# YOU CAN DEVELOP SKILLS THAT THE TOP 1% OF TRADERS HAVE

Aspect	Top 1% Traders (Winners)	90% Traders (Losers)
Approach	Calculated and methodical; rely on data and strategy.	Impulsive and emotional; react to market fluctuations.
Risk Management	Prioritize risk control; use stop-loss and proper sizing.	Ignore risk management; over-leverage and over-trade.
Mindset	Long-term focus; accept losses as part of the process.	Short-term mindset; fear and greed dominate decisions.
Strategy	Well-defined strategies; constantly refined through testing.	Lack of clear strategy; follow trends and rumors blindly.
Discipline	Highly disciplined; stick to their trading plan consistently.	Easily swayed by emotions; deviate from their plan often.
Learning Attitude	Constantly learn and adapt; embrace market changes.	Resist change; repeat mistakes without learning.
Capital Preservation	Aim for steady growth; focus on minimizing losses.	Focus on big wins; often lose significant capital quickly.
Execution	Execute trades with precision; pre-planned entry/exit.	Execute trades hastily; no clear plan for entry/exit.
Tools	Utilize advanced tools like backtesting, data analytics.	Rely on basic tools or none; often unaware of key tools.
Emotional Control	Prioritize risk control; use stop-loss and proper sizing.	Ignore risk management; over-leverage and over-trade.
Risk Management	Keep emotions in check; maintain composure in volatility.	Driven by emotions; panic and overreact to volatility.

**It's Upon You to Choose....**

# MEET THE MAN BEHIND IT ALL

**Ayush Patel**  
**Trader | Investor | Entrepreneur**

With over 1,000+ students taught.

"Let's be real – trading isn't about quick wins or following flashy indicators like you see all over social media. If you're serious about trading, it's about understanding the market, sticking to a system, and staying consistent."

I'm not going to promise you'll get rich overnight. What I will do is teach you how to think like a professional, follow strategies and methods that actually work, and build a trading career that lasts. It's not about lucky trades, it's

about making smart moves, managing risk, and winning consistently.

This program is for those who want to master the markets, not just play around. If you're ready to commit and build real success, I'm here to guide you every step of the way."

**- Ayush Patel**

# THE EVOLUTION OF THE STOCK MARKET

## 1600s -

The stock market takes shape.

## 1870s -

Stock exchanges are established in India.

## Early 20th Century -

The general public begins to actively participate in trading.

**BUT THEN...**

## The 2010s -

Retail trading explodes, becoming more accessible than ever, with many making fortunes and others facing losses.

Yet, one thing is clear:  
Those who truly understand the **system** and apply it effectively not only survive but **win** in the markets.

# THE STORY BEHIND

## 2018-2019

We embarked on a journey to explore how trading was being taught in India and worldwide.

Our realization: traders were learning **HOW MARKETS WORK**—But not **how to win in them**.

It was all:

- Basic learning
- Random analysis techniques
- Overcomplicated lessons

Yet, there was:

- No method of implementation
- No risk management
- No trading psychology
- No calculated plan
- No solid trading system

## 2020

We turned those **NOS** into one big **YES**. We developed a Traders' Program designed to build traders from the ground up —

**Not to just survive in the markets and make pennies, But to become professional system traders, consistently winning in the markets.**

## 2020 to Mid-2024

After introducing **2,000+ Students** to trading the way it should be, We continuously refined and improved the program, making it better with each iteration.

# 2024-PRESENT:

Now, with years of data at our fingertips, We have strategies that have been tested rigorously, Modified as needed, And proven in real-time markets.  
Our latest evolution,  
the

program, Is built for  
**the traders of the future.**

Designed to help traders win the long game, This program focuses on **system-based trading**, free from emotions.

It's built to ensure:

- No losses that truly matter
- Consistent wins that do

It's all about data guiding our steps.

- No predictions.
- No excitement.

Just a data-driven system.

# CHOOSE YOUR PATH...

90% OF TRADERS LOSE MONEY.

THE TOP 1% MAKING SUBSTANTIAL PROFITS ARE THE ONES WHO TREAT THE MARKETS LIKE PROFESSIONALS.

That's exactly what we're going to help you become.

**MARKETS WILL NEVER BE CONSISTENT,  
WHICH IS WHY WE MAKE YOU CONSISTENT  
INSTEAD.**

CONSISTENT IN:

Adapting to  
the markets

Sticking to  
a system

Becoming a  
true trader

Now, it's up to you to choose your path...

Be part of the 90% of traders who fall behind,

**OR RISE TO THE TOP 1%.**

# FROM OUR STUDENTS...

**Bharti Gajmoti**

★★★★★

Ayush Sir is a best mentor, his teaching skills is very good , simple and logical always, I'm very happy to learn with PathPledge Academy

**Priya Pandey**

★★★★★

Best institute for Trading, provides a great learning experience to beginners in stock market Ayush Patel teaches from basics till advanced in all markets.
